

Go Solo

LiveU

Best in broadcast, now online

Ever wanted to broadcast live to the Internet with true HD quality, and your smartphone just doesn't cut it? Think you can't afford professional streaming?

Well, now you can.

LiveU, the company which invented the portable live video-over-cellular space, is proud to introduce LiveU Solo. Built on LiveU's award-winning bonding technology, Solo is the most affordable, high-quality 'plug & play' live streaming solution on the market, offering the best live online viewing experience.

Thanks to LiveU's unique LRT™ (LiveU Reliable Transport) protocol, Solo delivers consistent and high-quality live video streams over the Internet. That means no buffering, no stuttering, and no failed transmissions.

Bring live sports, music or any other event to the web, and captivate your audience, private or public, Solo fits all. It is easy-to-use, intuitive and platform-agnostic – compatible with YouTube Live, Facebook, Wowza Streaming Cloud and other popular CDNs and OVPs. The choice is yours.

Product Highlights:

- **All-in-one solution** – a hardware device that's got it all. HDMI connector, SDI connector, internal battery and screen all inside a durable case.
- **Versatility** – use Solo with a compact camera or a shoulder mount. Just attach it to your camera or strap it to your belt.
- **End-to-end solution** – a complete live streaming solution, our web and mobile friendly management interface helps you to connect to your favorite online destination every time.
- **Bonding** – video reliability is important, we certainly know that! LiveU already supports hundreds of top tier broadcasters around the world with our professional live bonding solutions. We've now made bonding available for everyone. Connect two cellular net cards with SIM cards and we will bond them together to create a single fat connection to meet all your needs.
