

AUDIO CONNECT

A SUITE OF ADVANCED CLOUD-BASED AUDIO SOLUTIONS

High-quality and reliable audio communication between the station and the field plays a key role in professional live event productions. LiveU's Audio Connect solutions enable news anchors/producers in the station to communicate easily with camera operators/talents in the field.

LIVEU OFFERS TWO TYPES OF AUDIO COMMUNICATION SOLUTIONS:

▶ **LiveU IFB:**

One-way return voice communication from the station to the field

▶ **LiveU Audio Connect:**

Built on a new cloud-based infrastructure, facilitating diverse and simple two-way communication between the station and the teams on site

LiveU Audio Connect supports low delay and resilient audio communication. The solution leverages a smart algorithm that guarantees highest audio resiliency in every session regardless of network fluctuations.

An essential addition to your production toolbox, **LiveU Audio Connect** is easy to implement with a quick one-time setup. Simply route your audio signals in the station to one of your existing LiveU servers using an audio interface unit (the same unit used today for LiveU IFB) and start communicating with any of your field teams using the LiveU field units.

Audio communication can be made with any LU300, LU600, LU610 or LU800 field unit regardless of their transmission destination: physical server, cloud server or the LiveU Matrix IP content management and distribution platform. When used with the LU800, Audio Connect supports two separate audio channels, which can be used by the camera operator and the talent.

The **LiveU Audio Connect** can be managed flexibly from the LiveU Central unified management platform.

LiveU IFB & Audio Connect include the following solutions:

	COMMUNICATION TYPE	DESCRIPTION	PRICING & OFFERING
LIVEU IFB	One-direction	Return audio communication from the station to the field	Included free of charge in all LiveU units
LIVEU INTERCOM	One-to-one Bi-directional	Bi-directional audio communication between the station and the field	Optional add-on – based on number of physical audio interfaces in the station that are allocated to Audio Connect
LIVEU PRODUCER IFB*	One-to-many One-direction	One-way audio from the station to any number of field units, enabling real-time directions from the producer in the station to multiple camera operators	
LIVEU PARTY-LINE*	Many-to-many Bi-directional	Bi-directional audio conference call between any number of audio group members	Supported on the LU300, LU600, LU610 or LU800 field units

* Available at the end of 2020 / beginning of 2021
